

Deploying the solution to KUNet

1. Install FTP Client such as WinSCP
2. Login using your KU number and password (what you use to login normally to KU apps)

3. Upload BookingSystem/web to your web server folder.
 - a. What I do is first create a new folder called "BookingSystem"
 - b. I then upload the "web" subfolder
 - c. This makes the website available at:-
<http://kunet.kingston.ac.uk/<KUNUMBER>/BookingSystem/web>

N.B. The folder name you choose is CASE SENSITIVE when accessing your own url

C:\xampp\htdocs\				/home/k1736700/www/
